Description

Luxurious and seaworthy bluewater cruiser from France fully equipped for circumnavigation. A proven concept, the high standard of boatbuilding in the shipyard in La Rochelle and the focus on safety, reliability and comfort make AMEL sailing yachts legendary vessels for long distance cruising and you meet them in the most remote areas of the world. Very rigid, torsion-free construction using vinylester resins with laminated bulkheads. Deep, well-protected cockpit with fixed doghouse above the helm station. Bright and modern interior with plenty of light and air below decks through numerous large hull ports and coachhouse windows, eight deck hatches and seven portholes. The AMEL 60 offers plenty of room and living space for up to six people in a luxurious owner's cabin aft across the entire beam of the yacht, two symmetrical, spacious forward guest cabins and three heads compartments. This AMEL 60 will be completed at the yard in La Rochelle in April 2024. However, the owner will not be able to use her for personal reasons. This is an excellent opportunity to quickly obtain a comprehensively equipped, brand-new yacht without the long delivery times typical at AMEL. The extensive standard specification of the AMEL 60 already includes a carbon fibre furling mast, retractable bow thruster, 17.5 kVA diesel generator, lithium battery bank and much more. In addition, this particular yacht is equipped with all the options that make long trips and extended stays on board comfortable: ...
