## Description

Fast and exclusive 50-foot cruiser/racer from the Performance series of the Danish shipyard X-Yachts. The light weight high-tech construction in epoxy resin, the high righting moment thanks to a composite keel with T-shaped lead bomb and high ballast ratio and the modern, optimised hull design provide superior performance and sparkling fun on the water. Free, uncluttered areas on deck and the spacious, ergonomic cockpit provide plenty of room for a full racing crew to work, but the yacht can still be safely and comfortably handled by a small crew in cruising mode.

Very solid, rigid anti-torsion structure with carbon fibre strongback and bulkheads laminated to the hull. This XP-50 is a very well maintained, professionally serviced first hand owner's yacht. Although she is further optimised with a Southern Spars carbon fibre rig and a high quality ONE-Sails 4T-sailwardrobe, she has not been raced, but has only been used as a family cruiser in the waters around Sardinia. The XP-50 has the 3 cabin layout with optional separate shower in the second heads compartment and the sliding chart table in the saloon to starboard. Another beautiful feature of this yacht is the optional exclusive teak interior.

## Construction

- Hull in GRP foam sandwich with epoxy resin, Corecel M Foam sandwich core, E Glass fibres and carbon fibre reinforcements laminated in vacuum infusion process
